

Important alert for your family members.

Your doctor found **high-risk colon polyps** during your colonoscopy.

This means that ***your family members*** - parents, siblings and children - may be at higher risk for colorectal cancer.

Encourage family members under age 75 to talk with their doctor about colonoscopy screening every 5 years, beginning at age 40 or 10 years younger than your current age, whichever comes first.

Protect your family - early detection can save their life.
